

INCREASING EFFICIENCY.
REDUCING COSTS.

DataSync™

EVI's DataSync™ tool is an exceptional utility that makes data-sharing easy. It links to any Student Information System, Database, or database extract file (read-only).

This sync tool can bring in disaggregated data codes from other systems to EVI products for displaying reports by Gender, Ethnicity, Disability codes, ELL, 504, Free & Reduced lunch and more. The data pulled is based on what your district wants to disaggregate by. *It makes managing data uploads easy.*

- ✓ Can merge from multiple files or databases at the same time
- ✓ Re-rosters student data to the current teacher of record
- ✓ Runs on a scheduled task
- ✓ Allows for data integrity checks beforehand to keep your records up to date
- ✓ Best of all, EVI does the programming, and setup, so it's a zero impact product for your district
- ✓ This one sync tool implementation can update ALL Educational Vistas Products
